

The background of the top section is a photograph of various industrial components, likely valves or flanges, in a metallic finish. A white rectangular box is overlaid on the center of the image, containing the main headline text.

New structure. Fresh design. Even easier access to the information you need.

Dear Max,

We are pleased to introduce our newly revised catalogues, designed to make product information clearer, more accessible and easier to navigate.

New KHI Catalogue – More Structure, More Clarity

Our new KHI catalogue comes with a completely revised structure, making it easier than ever to find the right product and version at a glance.

The catalogue is now structured into flanged and welded versions from small to big nominal sizes. Our newest models KHI-F and KHI-S in steel and stainless steel are also already included.

With the new structure, you can quickly find the relevant product information and identify the right solution for your application.

New Glass Catalogue – A Fresh Look

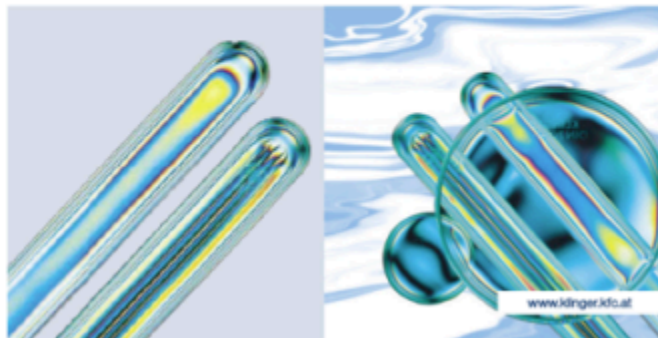

Our Glass Catalogue has also received a complete refresh.

Featuring a new, modern design, the updated catalogue gives our proven product range a fresh and contemporary look while making the information even more pleasant and intuitive to browse.

Available Now in Our Partner Area

Both new catalogues are available for download now in the Partner Area of our website. Take a look at the new design, explore the revised KHI structure and discover the latest product information.
