

V-PORT BALL FOR VALVE MODEL KHA:

- » For flow control and regulating applications, the ball valve model KHA is available with different V – Port balls.
- » Different characteristic curves due to various ball cuttings.
- » Applicable for clear medias without solids.
- » Easy combinable with pneumatic and electric control actuators.

V-PORT BALL FOR VALVE MODEL KHA:

- » V-Port ball versions are available with 10°, 30°, 60° angled and slotted cutting.
- » The different ball cuttings show different flow and regulation characteristics.
- » The V-Port balls in the different cuttings are available for the full line size range of the ball valve model KHA.

CONTROL VERSION KHA

V-Port KHA ball alves are combinable with:

- » Pneumatic actuators single and double acting for different air supplies
- » With positioner for pneumatic actuators with 4-20mA output
- » Different actuator brands possible: AIR TORQUE, ROTORK, ELOMATIC etc...

Or:

- » Electric regulation actuators for different power supplies
- » With actuator controls with 4-20mA output or for BUS connection
- » Different actuator brands possible: AUMA, SCHIEBEL etc...
